Publishing production: English, Publishing and Library Section, United Nations Office at Vienna.

Legal disclaimer

This booklet is intended to be a good practice guide for first responders at a wildlife crime scene, including those who may need to operate under sub-optimal conditions.

This is not a training manual; it is a reference guide that assumes users have the relevant knowledge and training to act as wildlife crime scene first responders, and are aware of relevant national legislation concerning crime scene management and evidence collection.

In practising the techniques described herein, it is the individual's responsibility to ensure they have appropriate personal protective equipment, an understanding of the risks involved in attending a wildlife crime scene and prior knowledge of how to use the various equipment and materials suggested.

The authors and editors cannot accept any responsibility for any prosecutions or proceedings brought or instituted against any person or body as a result of the techniques described. All crime scenes represented, photographed or documented are fictitious.

ACKNOWLEDGEMENTS

This guide was produced in partnership between the United Nations Office on Drugs and Crime (UNODC) Global Programme for Combating Wildlife and Forest Crime (GPWLFC) and the European Commission, through generous funding from the Government of France, and with technical guidance from the Netherlands Forensic Institute and TRACE Wildlife Forensics Network.

The guide reflects the discussions and contributions of subject-matter experts who participated in meetings of the African Wildlife Forensics Network in 2017 (the Hague, Netherlands) and 2018 (Pretoria, South Africa).

The production of the guide was coordinated by Sinead Brophy and Marcel van Beest. The text of the guide, along with the diagrams and photographs, were prepared by Simon Dures with editorial oversight from Irene Kuiper, Marcel van Beest and Rob Ogden.

The production team wishes to express its appreciation and thanks to the following experts who also contributed to the development of the guide: Yves Braet, Rod Potter and Justice Tettey.

CONTENTS
